Summary

Aspiring Software Engineer with hands-on experience building real-world applications that address practical challenges in Hospital Management Assistance, Student Management System. Experienced in developing scalable, user-centric web applications using React.js, JavaScript, Java, and SQL, with a focus on performance and maintainability. Strong problem-solving mindset with the ability to transform ideas into practical, user-focused software solutions. Committed to continuous learning and delivering meaningful impact through technology.

Skills

Languages: Java, JavaScript, HTML, CSS

Core Concepts: OOP, Collections Framework, Exception Handling

Frontend: React.js

DataBase: SQL

Tools/Others: Git, GitHub, Figma, VS Code

Projects

Hospital Management Assistant | REACT, WEB SPEECH API

Jan 2026 – Feb 2026

- Developed an AI-powered healthcare management platform using React.js and Web Speech API to automate patient triage, symptom assessment, and appointment scheduling through voice-enabled interactions.
- Designed and implemented a three-tier logistics system comprising Registry, Scheduler, and Pharmacy modules to streamline patient workflows and simulate medicine delivery tracking.
- Optimized User Experience by integrating SpeechSynthesis for hands-free guidance, resulting in a system capable of reducing manual administrative intake by an estimated 40%.

Student Management System | JAVA

Nov 2024 – Dec 2024

- Developed a Student Management System using Java to manage student records efficiently.
- Utilized the Collections Framework for storing, searching, and updating student data.
- Implemented Exception Handling and JDBC connectivity with MySQL to perform secure CRUD operations.

Bhagavad Gita Digital: Interactive Wisdom Platform | HTML, CSS, JS

Jun 2025 – July 2025

- Developed a responsive digital knowledge platform using HTML, CSS, JS, providing structured access to all 18 chapters and 700+ verses of the Bhagavad Gita with multilingual support in Telugu, and English.
- Engineered an efficient search and filtering system, enabling users to quickly locate specific chapters, verses, and teachings, improving content discoverability and learning experience.
- Applied modern frontend development practices to deliver a scalable, maintainable, and performance-driven web application.

Education

B.Tech. Computer Science And Engineering

2023 – present

Malla Reddy Engineering College, Hyderabad

CGPA: 8.68 / 10 upto 2nd year

Board Of Intermediate Education . MPC

2021 – 2021

S R Junior College, Adilabad

Marks: 934 / 1000

Board Of Secondary School.

2020 – 2021

New Arunodaya High School, Adilabad

Points: 10 / 10

Awards & Certifications

Deloitte Data Analytics Certificate – Coursera (2025): Gained proficiency in industry-standard data storytelling and visualization using Tableau and Power BI through Deloitte-led consulting case studies.

Python Certification– TechAugusta (2024): Successfully Completed the Python Training From TechAugusta Pvt Ltd.

C programming Certificate – Skilltimate (2023): It Validates My Programming Skills Which I Used To Develop C programming Based Project.

Cognizant Technoverse Hackathon 2026: Successfully participated in a national-level hackathon organized by Cognizant, showcasing coding, analytical thinking, and collaborative problem-solving abilities.
